

## Macro Group UK Young Researchers Medal Winners 2010

This year's award was made jointly to **Dr Jon Weaver** and **Dr Oren Scherman**

Dr Oren Scherman

Oren's research interests include the synthesis of functional nanosystems, controlled polymer architectures and dynamic supramolecular assemblies through molecular recognition processes. The underlying theme of his research lies at the interface between synthetic organic efforts on small molecules and macroscopic properties at the materials level, developing a macro-organic approach to chemistry. Dynamic supramolecular self-assembly of materials will be an area of great importance in the coming years, allowing for innovations in nanotechnology and at the biological and chemical interfaces.
